Debut longplayer by Pennsylvanian överkillers DELETIONS!! The Guys deliver an awesome as bloody hell, energy-laden mix of Synth-Punk / Noise Post-Punk / Garage-Punk! Alone the setup (real-life drums, guitar, synth and two singers) shows, that they don't try to ride the overhyped minimal wave-train, but are heavily influenced by cool end-70s shit like LOS REACTORS, UNITS, FUTURISK etc and the two awesome covers of "Walking Skeletons" by BILLY SYNTH and "Electrical Generator" by CARDBOARDS are telling the rest of the story! Well, sort of - there's definitely a pretty distinguished neo-garage sound in there, too. They don't try to be nice and clean! They are real, they are ecstatic and their sound awakens memories of unforgotten treasures like LOST SOUNDS, DIGITAL LEATHER ("Sorcerer"-era), RIVER CITY TANLINES and the newly-created bands like TELEDROME or SGNLS. Fuck it, they are incredible!!!
The LP is limited to 300 copies, all versions come with deluxe silk-screened covers!!
